DETAILED ACTION

Allowable Subject Matter.

1. Claims 1, 3, 4, 6-9 and 11 are allowed.
2. The application having been allowed, formal drawings are required in response to this Office Action.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose an information apparatus having a mouse cursor display function, where the scrolling speed display means for displaying a number of speed indicators during scrolling, the number of displayed speed indicators corresponding to a relative scrolling speed set by said pointing device while scrolling data on said display screen and arranging the speed indicators in a scrolling direction relative to a center of said mouse cursor.

Applicant illustrates in Fig. 6c, the state where the number of displayed speed indicators is changed step by step. The overall scroll period increases, and the scroll speed increases from low to middle to high speed in the downward, upward, left and right directions relative to the initial centrally located display, and where the number of speed indicators is increased to one, to two and to three. Also, as applicant indicates in the specification, while all four directions are shown in Fig. 6c, only the speed indicator corresponding to the current scrolling direction (and in a quantity corresponding to the scrolling speed) will actually appear on the desktop. This embodiment is shown in Fig. 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
